Apple is going to test self-driving cars

The Washington Post

Byline: Brian Fung and Hayley Tsukayama

After months of speculation that the company is developing automotive technology, Apple has officially leapt into the war for self-driving cars by obtaining a test permit from California regulators.

The permit allows Apple to begin testing up to three 2015 Lexus SUVs similar to the type that Google uses for its autonomous cars. By obtaining clearance from California's Department of Motor Vehicles, Apple is signaling that it is serious about pushing forward with self-driving technology despite reports last fall that it was scaling back its ambitions.

California's DMV disclosed the permit on its website Friday, which lists several dozen other companies that are testing self-driving technology. The group includes BMW, Ford, Honda, Nissan, Uber and others.

Like those other companies, Apple's test vehicles will have human drivers behind the wheel when they go out on public roads, according to California regulations.

Apple Unveils iPhone 7

NYTimes.com Video Collection

our incredibly fast 1.5P and wide color capture.

The New York Times Company

Apple announced the release of its newest smartphone, the iPhone 7. The new model replaces its headphone jack with a Lightning connector and includes an improved camera - it's the best iPhone that we have ever created. This is iPhone 7. Applause. So this is the iPhone 7 camera. New 12-megapixel camera system with optical image stabilization wider f/1.8 aperture six elements in the lens that sensors 60% faster, nova quad LED true tone flash our incredibly fast 1.5P and wide color capture. It's the best camera ever in an iPhone. And this is what we're doing on iPhone 7 Plus. It's plus a second camera. There's now two 12-megapixel cameras built in the iPhone 7 Plus. One has the wide angle 28-millimeter lens the same as the iPhone 7. The other is a telephoto 56-millimeter lens. Apple ear pods are the most popular headphones in the world. And with iPhone 7 and 7 Plus we're moving to connecting them over lightning. So that is why today we are so excited to show you a new product from Apple called Apple AirPods [Applause] We believe in a wireless future, the future where all your devices intuitively connect. [Music] [This believe drove the designer our new wireless AirPods [Music]

It's the best iPhone that we have ever created. This is iPhone 7.
