INTERVIEW WITH PROFESSOR

ARTICLE BY: KAHO SHIMADA | TRANSLATED BY: NGUYEN HONG HA EDITED BY: MARSYA SENTOSA

自分の性格に合う進路の見つけ方は何ですか? How do you find a career path that suits your personality?

When it comes to career design, personality, interests, values, strengths, and individuality are all important.

Through self-analysis, you will find out what is important to you, what excites you, and what motivates you the most. Students can also deepen their understanding of the suitable career path by giving feedbacks to each other.

卒業後は大学院へ進学すべきですか? それとも就職すべきですか? Do you think students should continue with graduate school or look for a job after graduation?

何に意味を見出し、何に魅力を感じるかによってそれぞれ卒業後の進路は変わってくるので、これが正しいというのはないと考えます。

自身のやりたいことによって大学院に進学した方が良い場合もありますし、実務経験を積んだ方が良い場合もあるからです。

I don't think there is a right or wrong way that one should or should not follow their graduation. The future path depends on what you find attractive and what you think is meaningful to you. Therefore, the decision depends on what you want to do, whether you think it is better to continue with graduate studies or gaining some work experience.

仕事を選ぶときに優先すべき基準は 何ですか? What criteria do you prioritize when choosing a job?

自分の強みや価値観がどの程度フィットしているかが大事です。調べるだけでなく説明会などで実際に話を聞くことも大切です。また、OB訪問を行うことも有効的です。

It's important to see how well your strengths and values fit with the job. It is important not only to do your research, but also to listen to what the company has to say at information sessions. It is also useful to visit alumni.

就職の際、得意な仕事と好きな仕事のどちらを選ぶべきですか? When choosing a job, which criteria should be prioritized?

その仕事が自分にとってモチベーションになるか、それとも得意えないなけれど進んでやりたいます。またによると思います。とだいまないので、5年後10年後と長い目で考えることも大切です。

It is important for you to know to what extent your strengths and values fit the job. It is not only crucial to do the research yourself, but to listen to what companies share at their information sessions is also vital. Visiting alumni for counselling and asking for their advice is also helpful in this case.

就職の際、先生はどうして先生になり ま し た か? Why did you become a teacher?

人生には自分で予期していない偶然の出会いというものがあります。私は心理学のカウンセリングに興味があったので大学卒業後は大学院へ進学しました。

院の卒業直前に恩師の方から、新しく大学でカウンセリングの学科を立ち上げるので一緒にやりませんかという誘いを受けました。私の教員のキャリアはそこから始まりました。APUに来る前は別の大学の教員として忙しく働いていましたが、APUの教員採用試験の中の模擬授業をしたときにAPU生の積極性に心を打たれ、来ることを決めました。自分が今まで進んできた道に偶然の出会いや誘いの声が重なることがあるので、そのチャンスを掴むことで人生が変わることがあります。

Life is full of unexpected things which just happen accidentally. To be honest, I was interested in counselling psychology, so after graduating from university, I went to graduate school. Then, right before I finished my graduate school, my teacher invited me to join him in starting a new counselling department at the university and I accepted his invitation. That was how my faculty carreer began. Before coming to APU, I was working as a teacher at another university. However, when I did a mock teaching session in the APU teaching recruitment examination, I was impressed by the positivive attitudes of APU students. Thus, I decided to come and teach at APU. Sometimes coincidental encounters and invitations coincide with the path you have been on, and by seizing these opportunities, you can change your life.

Final Message 最後に学生にメッセージ

「自分のやりたいことにたくさん挑戦し、どうか 自分の人生を切り開いていってください。」

"Please challenge yourself to do whatever you want to do and make the most of your life."

TO INTERN, OR NOT TO INTERN

ARTICLE BY: ARDHINA MULYA LALITA | APM, 4TH YEAR

EDITED BY: MARSYA SENTOSA

Last year, I had the chance to do an internship in the Marketing division of a parenting education start-up company under the Ministry of Education Indonesia. During the 3 months-long internships, my main tasks were creating promotional campaigns for the company's products and services, creating social media marketing plans, handling the website analytics, conducting market and trend analytics, etc.

Throughout the process, apart from learning about Digital Marketing technical skills such as Google Analytics and Content Marketing, the internship allowed me to learn how to communicate with people professionally, especially with public figures who collaborated with us. However, it was not always a smooth sail. One of the challenges I faced was the communication style.

My experience living in a diverse environment like APU shaped the way I communicate with people as I am used to the straightforward, clear, and transparent communication style. However, through this internship, I am reminded to work and communicate in a more high-context cultural environment. Thus, I discussed a lot with my manager and my colleagues to adapt my communication style better for a more comfortable and effective working situation.

In short, internships give me the chance to contribute to a company first-hand, while still having the student status pass (People are more lenient on you because you are there to learn!). Furthermore, the internship also allowed me to be surrounded by people who are skilled and knowledgeable in their field and to absorb their energy and motivation to keep upgrading our skills.

My advice for those seeking an internship experience is to ask yourself: What do I want to do? What kind of job, environment, company I aim for?... By asking yourselves questions, you can eliminate some options that might not be as relevant for you, so you can allocate your time and energy to effectively focus on companies/entities you really want!

Q1, Do you think online interview is harder compared to the offline interview?

I would say online interview is much easier because of less pressure. You can take the interview in your own pleasant environment like your cozy home, sitting in your favorite and comfortable place, it is not like walking into your dream company not knowing whether you would walk out with an offer or a rejection. In contrast, going to an actual company and sitting in front of 2 or 3 recruiters can be a very intimidating process.

Q2, How did you prepare for the job-hunting?

For me, step one was taking the APU Career Office's job-hunting guidance. The guidance is important because it provided

me with a rough idea of what jobhuntingis and where to start. After that, I did career counseling with the APU Career Office. Here I received a lot of helpful advice to improve my CV. Besides, as I did the job-hunting in English, LinkedIn is the job-hunting website that I only used. From LinkedIn, I registered for my favorite company's website to get updated with their latest recruitment's information.

Q3, Do you have any advice for students who are doing or going to do the job-hunting?

Find a senpai you might know from the company, consult with him/her, learn from their experience and mistakes. To prepare for my dream company, I consulted with a senpai who is already working in that company. I found her on the company's website and she used to be an APU student.

Q1, Did you take the job interview online/offline? What are the advantages/disadvantages of it?

All of my interviews were offline. I would say the advantages of offline interviews are the opportunities to visit the office to understand more about the company's cultures and its working environment. Also, the required group work becomes more natural because you have the chance to meet and discuss with other candidates in person.

Q2, What was the hardest thing and how did you overcome it?

For me, the hardest thing was doing the interviews and group work in Japanese. To prepare for each interview, what I did was that I prepared answers for all possible questions in advance. Besides, I believe most companies that want to hire international

students, they look for the unique characteristics. Hence, I tried to appeal myself with evidences like numbers, facts and detailed plans on how I would achieve my goals and how I can contribute to the company.

Q3, Is Japanese an important factor to apply for the job?

I usually looked on a site called open work for 社員クチコミ and get advices from APU Career Office. I also got my resume revised and did many mock interviews with APU staffs not only for my internships application but also for the job hunting.

Q1.オフライン就活ならで はの長所や短所は何だと考 えますか? オンライン就活に比べて難 しいと思いますか?

オフライン就活はオンライン就活よりも時間的、経済的な負担はありますが、実際に人事の方と会って話すことで企業とのミスマッチが起こりにくいです。

一方で、オフラインの場合肌に合わないと分かれば違う企業へとシフトすることが簡単にできるので、意思決定のしやすさという面ではオフライン就活の方が有利だとも考えます。

インターンシップで学んだこと

EDITED BY: KAREN TANIGUCHI

オンライン・インターンシップの経験

4年生の春休みに3日間のオンラインインターンシップに参加しました。インターンシップ先は人材系コンサルティング会社で、他の企業が新卒採用に向けてどのように改善・向上できるかに主に力を入れている企業でした。

インターンシップのいい所は自分に向いている仕事や本当にやりたいことを見つけられることです。自分のやりたい仕事だと思ってインターンシップに参加してみたら、実は少し違っていたり、逆にあまり自分に向いてないと思っていたが参加してみたら興味を持てたなどインターンシップに参加することで得られることは沢山あると感じました。

一言アドバイス

これからインターンシップをしようと考えている学生はインターンシップという限られた時間を有意シップに考えながら、インターンシップに参加して欲しいと思います。例えば、「今の自分はどうでしたか」、「言葉使いはどうでしたか」、「自分の第一印象はどんな感じでしたか」なの質問をすることで、企業へ好印象を与えるできるし自分の評価を客観的に知ることもすると思います。グループできないの学生のレベルが高く、自分にはよっの時に周りの学生のレベルが高く、自分にははったいしらあるはずです。APUで行ってきたグルークで学んだことを活用し、完璧に出来なく何か爪痕は残すべきだと思います。

HOW DO YOU LOOK FOR INTERNSHIPS?

EDITED BY: MARSYA SENTOSA

Adapting to Online Internship

I have heard from my friends that doing online internships comes with many expectations. Like having online classes, time starts to get distorted. Before the pandemic, I used to be able to clearly separate my personal and working time. Nowadays, it seems like I'm just constantly on my laptop or phone doing either academic or non-academic work. I was fortunate enough to have a very understanding supervisor, whom I was able to share this concern of mine, and he immediately offered some working alternatives. My co-workers were extremely supportive, and I learned many things. The most memorable one would probably have to be adaptability. Since it was online, often people's schedules would clash, and deadlines still had to be met. So, I had to constantly adapt not only my schedule but also my work ethic. It was a no brainer that I would have to cover for my co-workers, but that didn't mean I had to constantly bear with their mistakes. My co-workers and I adapted to each other, and because we realized that this is a common issue when we're working with end, it felt like we have bonded with each other.

How I looked for internships

I mainly look for internships on Instagram accounts and recently on LinkedIn. Online internships are becoming more common in Indonesia during the pandemic. So, I would often come across various Instagram accounts that mainly post about internship openings. I had also been looking for internships on LinkedIn, but the available ones required applicants to work from the office.

Considering that my house is quite far from the metropolis, the openings posted on the previously mentioned Instagram accounts seemed more interesting. It was easy to do since all I had to do was to keep on scrolling through their Instagram feed until I found some options that really piqued my interest. Most of the posts have all the information, such as job description, application deadline, and criteria of the applicant. I do have to say, the internship openings on these Instagram accounts are usually unpaid. So, if you'd like to find ones that do include a monthly stipend, I highly recommend going through LinkedIn from time to time.
